TILGHMAN ORTHODONTICS PROVIDES A PURPOSEFUL TREATMENT PLAN TO GUIDE ITS PATIENTS TO BEAUTIFUL AND LIFE-CHANGING SMILES

Tilghman Orthodontics has been providing high-quality orthodontic care and innovative, cost-effective solutions for creating beautiful smiles since 2001.

A few years ago, Tilghman Orthodontics began offering its patients a treatment option that provides healthy smiles at more affordable prices. It's called Smiles Correct, and it has been successful for hundreds of patients who have benefited from this in-house advancement using 3D-printing technology. Tilghman Orthodontics prints models that represent the incremental changes needed to shift patients' teeth and then fabricates its Smiles Correct aligners from those models.

Dr. Tilghman points out that mail-order aligner trays have no direct doctor supervision, X-rays or clinical exams. The Smiles Correct aligner trays are a cost-effective option created with oversight from

experienced Drs. Michael Tilghman and Carrie Schwartz, who provide care, direction and guidance with each step of the treatment.

The Smiles Correct treatment option is a convenient choice for patients who have had previous treatments, like braces, but now need additional refinement. Because Smiles Correct are made at Tilghman Orthodontics, patients consistently save time and money.

Although offering a cutting-edge solution like Smiles Correct is one option, other patients may need a more traditional approach to orthodontic care. Dr. Tilghman notes that "the majority of our young patients still need traditional treatment, with braces, brackets and aligners." Tilghman Orthodontics uniquely customizes each patient's plan and refuses to offer a one-size-fits-all approach for their needs. The care provided is practical and focuses on providing the best, most appropriate treatment for each patient.

Comprehensive care at Tilghman Orthodontics is a hallmark of the practice — and begins through an assessment, diagnosis and potential monitoring phases before treatments commence. The Tilghman Orthodontics' team takes great pride in guiding patients through their plan of care — and the results are literally life changing.

"Having a new, beautiful smile on one of the biggest days of my life was such an amazing feeling," said patient Zoe Messick. "It boosted my confidence and made me feel my absolute best on my wedding day! Dr. Tilghman has genuinely given me a smile I have always wanted!"

Quality care, experience and cost-effective solutions are what sets Tilghman Orthodontics apart from other practices in the area. Now, with the success of Smiles Correct, their innovation and experience is furthering individualized solutions for its patients. **CS**
